

The screenshots illustrate the workflow of a mobile application for identifying vehicles:

- Initialisation:** Shows a red square icon with a black diamond symbol and the text "Nom Application mobile".
- Camera:** Displays a camera viewfinder with a blue bounding box around a blue sedan. Below it, the text "Berline détectée (99%)".
- Résultat:** Shows the search results screen with a list of detected objects:
 - Berline (99%)
 - Camion (78%)
 - Trottinette (89%)
 - Vélo (89%)
 - Bus (78%)Buttons at the bottom include "Sauvegarder" and "Partager".
- Détails:** Provides a detailed view of the detected car, showing its image, the classification "Berline", the count of identified vehicles (1), and the average confidence (99%). A large blue button at the bottom says "Supprimer de l'historique".
- Menu:** Shows the user profile "Ouadie Abbaz" and various settings options: Aide, À propos, Paramètres, Langue (French selected), Thème (Dark mode selected), and a "Nom Application mobile" field.
